GENERAL SAFETY AND OPERATION

1. Use with the proper electrical receptacle. On single phase models cord is supplied with a grounding type, 3-prong plug. On a three phase models, no 3-prong plug is supplied.
NOTE: DO NOT USE GROUNDING ADAPTER.
2. Do not use if outer covering of cord becomes excessively cut or worn.
3. Each pump comes with a built-in handle for lifting. For added convenience, the 899045 25 ft. marine rope can be attached to the handle.

WARNING

Do not lift with power cord. This can cause damage to the connection and result in shock or serious injury.

4. Continued cycling on and off is an indication the motor is in overload. Make certain the pump is level and adequately submersed in liquid.
NOTE: CONTINUED OPERATION WITH EXCESSIVE CYCLING WILL OVERHEAT AND BURN OUT MOTOR.

5. All automatic models come with a float switch to shut -off unit when liquid level drops below safe operation. For field retro-fit, the 899080 [115V] float switch can be added to automate the manual units.
