## FOREWORD

Agent Orange is a highly toxic herbicide and defoliant chemical, one of the tactical use “Rainbow Herbicides” used by the U.S. military during the Vietnam War. It was highly effective in defoliating hiding places used by the Viet Cong, decimating rice paddies and fields that provided them with food, and clearing the perimeters of military bases to give U.S. service members an unobstructed line of fire. Although colorless, the chemical is known as “Agent Orange” because of an orange band painted on the drums used to store and transport it. After the war, Agent Orange’s effectiveness was overshadowed by the unanticipated repercussions of its use: debilitating and often lethal health consequences for those exposed and for their children and grandchildren, as well as hugely damaging environmental effects.

After years of suffering by Vietnam veterans and their families and of advocacy led by VVA, Congress enacted into law the *Agent Orange Act of 1991*. This legislation empowered the Secretary of Veterans Affairs to declare certain maladies “presumptive” to exposure to Agent Orange/ dioxin and enabled Vietnam veterans, as well as some veterans who served along the demilitarized zone in Korea in the late 1960s, to receive treatment and compensation for these health conditions.

Since that time, the list of approved “presumptive” illnesses has gradually grown as well as the list of servicemembers in country and outside Vietnam who are now recognized as having been exposed. Most recently, the *Honoring our PACT Act of 2022* (Public Law 117-168) extended eligibility based on presumptive illnesses to all veterans who served and to their families, in the following locales: any U.S. or Royal Thai base from 1/9/62-6/30/76; Laos from 12/1/65-9/30/69; Mimot or Krek, Kampong Cham Province, Cambodia, from 4/16/69-4/30/69; Guam, American Samoa, or their territorial waters from 1/9/62-7/31/80; and Johnston Atoll, on or aboard a ship that called there, from 1/1/72-9/30/77. The newest additions to the list of presumptive illnesses are hypertension and Monoclonal Gammopathy of Undetermined Significance (MGUS). VVA continues to advocate for our veterans and their families, many of whom are feeling the effects of exposure, and for more research into the long-term effects of Agent Orange on veterans’ progeny. This guide is designed to keep you informed on the status of Agent Orange claims and compensation.

Jack McManus  
National President  
Vietnam Veterans of America

## INTRODUCTION

The purpose of this Vietnam Veterans of America (VVA) guide is simple: to present information and describe the process in a user-friendly fashion for a Vietnam veteran or (surviving) family member to file a claim for service-connected disability compensation or death benefits with the Department of Veterans Affairs (VA) for illnesses/diseases associated with exposure to Agent Orange and other related herbicides during military service. At the outset, please understand that the VA claims process is complicated, frustrating, and can be time-consuming. Please understand also that these guidelines are not legal advice.

VVA hopes this guide will be helpful:

- If you have never filed a VA claim for disability or death compensation because of exposure to Agent Orange; or
- If you have filed a VA claim for disability or death compensation because of Agent Orange exposure and it was denied (after all appeals, if any) by the VA *before* September 25, 1985 (this includes claims or death benefits for Adult Onset Type II Diabetes and ancillary conditions, Parkinson’s disease, ischemic heart disease, and B-cell leukemias); or
- If you have filed a VA claim for disability or death compensation due to Agent Orange exposure and it was denied (after all appeals, if any) by the VA *on or after* September 25, 1985, or if it is still pending. In this situation, do not file a new claim. Contact the appropriate VA Regional Office in writing to confirm and ask the following: 1) whether you filed a claim; 2) what disability was claimed; 3) whether the claim was based on Agent Orange exposure; 4) whether the claim is in the VA’s “Special Issue Rating System” (e.g., Nehmer) Agent Orange claim; 5) does the VA have your current mailing address; and 6) request a copy of your entire claims file, your “C-file”; or
- If you do not remember 1) whether you’ve ever filed a VA claim; or 2) when you filed a VA claim; 3) whether you stated that the disability or death in your VA claim was due to Agent Orange exposure; or 4) you believe you have a medical condition (or the veteran’s death was) due to Agent Orange exposure. In this situation, file a claim as soon as possible, and request a complete copy of your C-file from the nearest VA Regional Office. You can find your nearest VA Regional Office here: <https://www.benefits.va.gov/benefits/offices.asp> or by calling 1-800-827-1000.

Veterans can get information about benefits or file a claim for benefits by visiting the VA website at [www.va.gov](http://www.va.gov). Veterans with specific claims or other questions may request information via Inquiry Routing & Information System (IRIS) or by telephone at 1-800-827-1000.

## WHAT IS AGENT ORANGE?

A host of herbicides were used by the U.S. military in Vietnam and other Southeast Asian countries to protect American and allied troops by defoliating the dense jungle vegetation hiding enemy positions. The herbicides were named for the color-coded bands on the 55-gallon drums in which they were shipped; examples included Agent Blue, Agent White, and the most extensively used herbicide, Agent Orange. In Vietnam, herbicides were sprayed from fixed wing and rotary aircraft, trucks, and backpack sprayers to clear vegetation around fire bases, landing zones, and along river banks. It is estimated that between 1962 and 1971, almost 11 million gallons of Agent Orange were sprayed in Vietnam, primarily through an aerial spray program code-named "Operation Ranch Hand." Agent Orange was also used at military installations and other facilities on and outside of the U.S. mainland, including Hawaii and Puerto Rico, as well as Cambodia, Canada, Korea, and Thailand.

Agent Orange is a combination of two compounds, 2,4-D and 2,4,5-T, technically known as chlorinated phenoxy acids in ester form. The most dangerous element of Agent Orange is a contaminant present in the manufacture of 2,4,5-T; this impurity is known chemically as 2,3,7,8-tetrachlorodibenzo-paradioxin, or more commonly, dioxin. Levels of dioxin in Agent Orange ranged from less than 0.05 parts per million to almost 50 parts per million.

- In Vietnam, herbicides were sprayed from fixed wing and rotary aircraft, trucks, and backpack sprayers to clear vegetation around fire bases, landing zones, and along river banks.

Some three million veterans served in Southeast Asia, and no one knows for sure how many of these veterans were exposed to Agent Orange. Some of these personnel were deployed in areas during and immediately after spraying operations, while others actually handled Agent Orange and did the spraying. Veterans exposed to Agent Orange and its dioxin contaminants have reported a variety of serious health problems and symptoms; these include chloracne, skin lesions, liver damage, loss of sex drive, changes in skin pigmentation and sensitivity to light, numbing or tingling in the extremities, sore joints, cancers, and birth defects in their children.

For an incomplete list of locations and dates where dioxin (Agent Orange and other agents) was used, consult the links on the VA web page online at <http://www.publichealth.va.gov/exposures/agentorange/militaryexposure.asp>

**Acute Peripheral Neuropathy:** a temporary dysfunction of the nervous system characterized by involuntary "tingling" or numbness in the extremities

**Adult Onset Type II Diabetes Mellitus** (and subsequent complications caused by): non-insulin dependent and characterized by high blood sugars

**AL Amyloidosis:** a rare group of diseases that results from the abnormal deposition of a particular protein called amyloid in various tissues of the body

**\*Chloracne:** an acne-like eruption on the skin due to prolonged exposure to certain chlorinated compounds

**Hodgkins Disease:** a tumor found in the lymph nodes characterized by increasing enlargement of the lymph nodes, liver, and spleen, and accompanied by progressive anemia

**Hypertension:** condition in which blood vessels have persistently raised pressure. Symptoms may include early morning headaches, nosebleeds, irregular heart rhythms, vision changes, and buzzing in the ears. Severe hypertension can cause fatigue, nausea, vomiting, confusion, anxiety, chest pain, and muscle tremors. If untreated, can lead to heart attack and stroke.

**Hypothyroidism:** Condition where thyroid doesn't create and release enough thyroid hormone into the bloodstream, causing metabolism to slow. Can cause fatigue, weight gain, and low tolerance for cold temperatures. Main treatment is hormone replacement therapy (HRT). It may not cause noticeable symptoms in early stages, but over time can cause increasing health problems such as obesity, joint pain, infertility, constipation, muscle and joint weakness, aches, tenderness, swelling

and stiffness, depression, impaired memory, and heart disease. Signs and symptoms vary, depending on severity. Problems tend to develop slowly, often over a number of years.

**Ischemic (or ischaemic) Heart Disease:** a heart condition resulting when the arteries that bring blood and oxygen to the heart are blocked. There may be a buildup of cholesterol and other substances, called plaque, in the arteries that bring oxygen to heart muscle tissue. Over time, the heart muscle does not work well, and it is more difficult for the heart to fill and release blood. It is the most common cause of congestive heart failure.

**MGUS:** *Monoclonal Gammopathy of Undetermined Significance* – condition in which abnormal protein, formed within the bone marrow, circulates in the blood. MGUS usually causes no problems and has few symptoms. Can progress to more serious diseases, e.g., blood cancers. Complications include bone fractures, blood clots, and kidney problems.

**Non-Hodgkins Lymphoma:** Non-Hodgkins lymphoma, including chronic lymphocytic leukemia and small-cell lymphocytic lymphoma: a rare type of cancer which causes malignant tumors of the lymph nodes, distinguished from Hodgkins disease by the absence of giant Reed-Sternberg cells.

**Parkinsonisms:** Parkinsonism is a group of neurological conditions that may manifest as movement problems such as tremors, slowness of movement and rigidity, as well as a range of cognitive impairments. Parkinsonisms look like Parkinson's disease (PD) and can be confusing to differentiate. Parkinsonisms typically don't include a tremor and affect both sides of the body, whereas PD generally affects one side more than the other. Disease progression, response to medications, and other factors can help distinguish PD from Parkinsonisms, which typically do not respond as well to drug treatments and have a worse prognosis as compared to typical PD.

**Parkinson's Disease:** a neurological disease limiting the ability to control some muscles. Caused by a gradual loss of dopamine-manufacturing cells in the brain, Parkinson's disease often causes movement and muscle problems and may be accompanied by slight, uncontrolled shaking of the arms and legs.

\***Peripheral Neuropathy:** a dysfunction of the nervous system involving either the somatic nerves or the autonomic nervous system (see Acute Peripheral Neuropathy); can cause sensory loss, atrophy, and muscle weakness

\***Porphyria Cutanea Tarda:** characterized by skin lesions on exposed portions of the body and pigment changes in the skin; liver disease occurs in some patients

**Spina Bifida** in children conceived after the veteran first arrived in Vietnam: characterized by a defective closure of the spinal cord in which the cord may be exposed and/or protrude

**Sub-acute Peripheral Neuropathy:** a nervous system disorder either acute (temporary) or chronic (long-term) – see acute peripheral neuropathy and peripheral neuropathy

#### CANCERS

**Cancer of the Bronchus:** a malignant tumor found in the bronchus, an extension of the windpipe (trachea) connecting to the lungs

**Cancer of the Larynx:** a malignant tumor found in the voice box (larynx)

**Cancer of the Lung:** a malignant tumor found in the lungs

**Cancer of the Prostate:** a malignant tumor found in the prostate gland

**Cancer of the Trachea:** a malignant tumor found in the windpipe (trachea)

**Adult Fibrosarcoma:** a tumor formed from connective tissue

**Alveolar Soft Part Sarcoma:** a sarcoma found in the aveoli, the sac-like ducts in the lungs

**Angiosarcoma:** a tumor occurring on the breast and skin and believed to originate from blood vessels

**Bladder cancer:** A malignant tumor found in the bladder. Symptoms may include blood in the urine (most common), frequent urination, pain while urinating, back and/or pelvic pain.

**Chronic Lymphocytic Leukemia:** characterized by a progressive increase in production of white blood cells

**Clear Cell Sarcoma of Aponeuroses:** a sarcoma found at the end of a muscle where it becomes a tendon

**Clear Cell Sarcoma of Tendons:** a sarcoma found in the tendons

**Congenital Fibrosarcoma:** a malignant tumor formed before birth and derived from connective tissue

**Dermatofibrosarcoma:** a relatively slow-growing skin tumor consisting of one or more firm nodules

**Ectomesenchymoma:** a tumor found in certain parts of the skin

**Epithelioid Malignant Leiomyosarcoma:** a malignant tumor derived from smooth muscle found in the layer covering the muscle

**Epithelioid Malignant Schwannoma:** a moderately firm, benign tumor found in the layers of membrane covering surfaces inside the body cavity caused by too many Schwann cells growing in a disorderly manner

**Epithelioid Sarcoma:** a tumor found in the membrane covering surfaces inside the body cavity

\* Diseases with various time requirements

## ILLNESSES/DISEASES RECOGNIZED BY THE VA AS CONNECTED TO AGENT ORANGE HERBICIDE EXPOSURE (continued)

**Extraskeletal Ewing's Sarcoma:** a tumor outside the bone consisting of small rounded cells

**Hairy Cell Leukemia:** a rare slow-growing chronic cancer of the blood called such because the leukemic lymphocytes have short, thin projections on their surfaces that look like hairs when examined under a microscope. Hairy cell leukemia is caused by an abnormal change in B lymphocytes (a type of white cell).

**Hemangiosarcoma:** a tumor derived from blood vessels and lining blood-filled spaces

**Infantile Fibrosarcoma:** a tumor formed as a child derived from fibrous connective tissue

**Leiomyosarcoma:** a tumor derived from smooth muscle

**Liposarcoma:** a tumor that may occur anywhere in the body consisting of irregular fat cells

**Lymphangiosarcoma:** a tumor derived from blood vessels

**Lymphoma:** a malignant tumor of the lymph nodes

**Malignant Fibrous Histiocytoma:** a type of tumor found in connective tissue

**Malignant Giant Cell Tumor of the Tendon Sheath:** a tumor found in the membrane of tendons

**Malignant Glandular Schwannoma:** a moderately firm malignant tumor in the glands caused by too many Schwann cells growing in a disorderly pattern

**Malignant Glomus Tumor:** a tumor found in the tiny nodes (glomuli) in the the nailbed, pads of fingers, toes, ears, hands, feet, and other body organs

**Malignant Hemangiopericytoma:** a tumor characterized by rapidly growing fat cells formed in blood vessels and lining blood-filled spaces

**Malignant Mesenchymoma:** a malignant tumor in the embryonic tissue or fluid

**Malignant Schwannoma with Rhabdomyoblastic:** a moderately firm malignant tumor found in skeletal muscle resulting from the rapid disorderly growth pattern of Schwann cells

**Multiple Myeloma:** cancer of specific bone marrow cells characterized by bone marrow tumors in the skeletal system

**Proliferating Angioendotheliomatosis:** increasing numbers of benign tumors in blood cells often causing skin discoloration

**Rhabdomyosarcoma:** tumors derived from skeletal muscle

**Sarcoma:** tumors arising in connective tissue, bone, cartilage, or muscle

**Soft Tissue Sarcoma:** a group of soft tissue cancers characterized by malignant tumors which develop on muscles and connective tissue, or in body fat

**Synovial Sarcoma:** a tumor found in the lubricating fluid surrounding joints and tendons

A current version of this guide can be viewed online at [www.vva.org](http://www.vva.org).

*NOTE: This list may change over time. For official updates, see Title 38 Code of Federal Regulations Section 3.309(e) "Diseases associated with exposure to certain herbicide agents."*

## BIRTH DEFECTS RECOGNIZED BY THE VA AS CONNECTED TO AGENT ORANGE EXPOSURE

**Spina Bifida:** children born to either male or female Vietnam veterans; Spina Bifida Occulta not included

### CHILDREN BORN TO FEMALE VIETNAM VETERANS

**Achondroplasia:** produces a type of dwarfism

**Cleft Lip and Cleft Palate**

**Congenital Heart Disease**

**Congenital Talipes Equinovarus:** clubfoot

**Esophageal and Intestinal Atresia**

**Hallerman-Streiff Syndrome:** premature small growth and other related defects

**Hip Dysplasia**

**Hirschprung's Disease:** congenital megacolon

**Hydrocephalus Due to Aqueductal Stenosis**

**Hypospadias:** abnormal opening in the urethra

**Imperforate Anus**

**Neural Tube Defects**

**Poland Syndrome:** webbed fingers

**Pyloric Stenosis**

**Syndactyly:** fused digits

**Tracheoesophageal Fistula**

**Undescended Testicles**

**Williams Syndrome:** thyroid defects

Not covered are conditions that are congenital malignant neoplasms, chromosomal disorders, or developmental disorders. In addition, conditions that do not result in permanent physical or mental disability are not covered.

*NOTE: This list may change over time. Veterans may obtain more information on birth defects and should register all children and grandchildren with birth defects, including cancers and learning disabilities, online at [www.birthdefects.org](http://www.birthdefects.org), maintained by the National Birth Defect Registry.*

## WHAT IS PRESUMPTIVE SERVICE-CONNECTED AGENT ORANGE DISABILITY COMPENSATION?

**VA** pays service-connected disability compensation to veterans who show an event or injury in service, a current disability, and a link between the two. Scientific evidence has demonstrated that there is an association between development of certain disabling medical conditions and exposure to Agent Orange and other related herbicides.

If the veteran served:

- In the Republic of Vietnam, regardless of the length of that service, during the period January 9, 1962, to May 7, 1975;
- In any U.S. or Royal Thai base from 1/9/62-6/30/76; Laos from 12/1/65-9/30/69; Mimot or Krek, Kampong Cham Province, Cambodia, from 4/16/69-4/30/69; Guam, American Samoa, or their territorial waters, from 1/9/62-7/31/80; and Johnston Atoll, on or aboard a ship that called there, from 1/1/72-9/30/77
- On a ship or boat that operated in Vietnam's inland waterways or in the offshore waters of the Republic of Vietnam and Cambodia, between January 9, 1962, and May 7, 1975. The Blue Water Navy Vietnam Veterans Act 2019 (Public Law 116-23) extends a presumption of herbicide exposure to all Blue Water Navy Veterans who served and to their families. For more information, go to [https://www.va.gov/Blue\\_Water\\_Navy\\_Factsheet.pdf](https://www.va.gov/Blue_Water_Navy_Factsheet.pdf)
- In Korea between September 1, 1967, and August 31, 1971; in a unit recognized by the VA and DoD to have operated in an area in or near the Korean DMZ in which herbicides were applied. For a list of recognized units, go to: <http://www.publichealth.va.gov/exposures/agentorange/korea.asp>

The amount of the compensation payment depends upon the severity of a veteran's service-connected disability and, in some cases, the number of qualifying family members the veteran has. The VA uses a percentage basis ranging from zero percent to 100 percent for measuring the severity of the veteran's service-connected disability; the higher percent the disability and the more qualifying family members the veteran has, the higher the monthly compensation payment. However, a percentage rating of 0 – 20 percent does not pay extra for dependents.

Generally, the VA will only grant service-connected disability compensation based on exposure to Agent Orange through what the VA calls its "presumptive service-connected rules." The VA presumes (or holds true) that veterans have been exposed to Agent Orange and are eligible for service-connected disability compensation and health care if they develop one or more of the medical conditions listed on pages 4 and 5 of this guide and served in any of the areas noted above during the periods noted therein.

**B**ecause Agent Orange was also used at military installations and other facilities on and outside of the U.S. mainland — including Hawaii and Puerto Rico, as well as localities in Canada, Korea, Okinawa, the Philippines, and Thailand — veterans who served in these localities may also be eligible for Agent Orange disability compensation. For an incomplete list of locations and dates where dioxin (Agent Orange and other herbicide agents) was used, consult the VA information available online at <https://www.publichealth.va.gov/exposures/agentorange/locations/tests-storage/index.asp>. If you served in any of these places, came into contact with Agent Orange, and are suffering illnesses/diseases related to Agent Orange exposure, VVA urges you to file a claim.

## HOW DO I KNOW IF I QUALIFY FOR PRESUMPTIVE SERVICE-CONNECTED AGENT ORANGE DISABILITY COMPENSATION?

To qualify, you generally need to show only two things:

- You served on active duty in the military, naval, Coast Guard, or air service in the Republic of Vietnam, regardless of the length of that service during the period January 9, 1962, to May 7, 1975; in Korea between April 1, 1968, and August 31, 1971, in a unit that operated in an area in or near the Korean DMZ in which herbicides were applied between September 1, 1967 and August 31, 1971; (for a list of units currently recognized, go to <http://www.publichealth.va.gov/exposures/agentorange/korea.asp>); on any U.S. or Royal Thai base from 1/9/62-6/30/76 in Thailand; or if you served with the U.S. Navy or U.S. Coast Guard in Vietnam between January 9, 1962, and May 7, 1975, and your ship/boat operated in Vietnam's inland waterways, ventured into Vietnam's inland waterways on occasion, or if you served in the offshore waters of the Republic of Vietnam and Cambodia, between January 9, 1962, and May 7, 1975, and received the Vietnam Service Medal, even if you did not enter the inland waterways or did not set foot in the Republic of Vietnam, you and your family are eligible for compensation for a disability related to herbicide exposure (for a list of naval and Coast Guard vessels currently recognized go to <https://www.publichealth.va.gov/exposures/agentorange/locations/index.asp>); and those locations added by the Pact Act, noted in the second paragraph of the box below.
- You currently have been diagnosed with one of the diseases found on the VA's list of conditions linked to herbicide exposure, or you currently have residual or secondary conditions from one of these illnesses (see pages 4–5).

All veterans who served in the offshore waters of the Republic of Vietnam and Cambodia, between January 9, 1962, and May 7, 1975 and who received the Vietnam Service Medal, even if they did not set foot in the Republic of Vietnam, are now eligible for presumptive service connection due to exposure to Agent Orange. The Blue Water Navy Vietnam Veterans Act 2019 (Public Law 116-23) extends a presumption of herbicide exposure to all Blue Water Navy Veterans who served and to their families. For more information, go to [https://www.va.gov/Blue\\_Water\\_Navy\\_Factsheet.pdf](https://www.va.gov/Blue_Water_Navy_Factsheet.pdf)

The *PACT Act* adds hypertension and Monoclonal Gammopathy of Undetermined Significance (MGUS) to the list of presumptive diseases. It also extends eligibility based on presumptive illnesses to all veterans who served and to their families, in the following locales: any U.S. or Royal Thai base from 1/9/62-6/30/76; Laos from 12/1/65-9/30/69; Mimot or Krek, Kampong Cham Province, Cambodia, from 4/16/69-4/30/69; Guam, American Samoa, or their territorial waters from 1/9/62-7/31/80; and Johnston Atoll, on or aboard a ship that called there, from 1/1/72-9/30/77.

## WHAT IS THE AGENT ORANGE REGISTRY?

In 1978, the VA began a program to examine and to record the names of veterans concerned about health problems related to their exposure to Agent Orange and other herbicides during their military service in Southeast Asia. Eligible veterans qualify for an Agent Orange Registry examination at the VA. Almost 690,000, one out of every five veterans — or one out of every six who served there — are in the registry.

### Who Is Eligible for the AO Registry Exam?

Under Public Laws 102-585 and 100-687, any U.S. male or female veteran who served on active duty in the military, naval, Coast Guard, or air service in the Republic of Vietnam, regardless of the length of that service during the period January 9, 1962, to May 7, 1975; “in Korea in or near the DMZ between September 1, 1967 and August 31, 1971, in a unit recognized by the VA and DoD to have operated in an area in or near the Korean DMZ in which herbicides were applied (for a list of units currently recognized, go to <http://www.publichealth.va.gov/exposures/agentorange/korea.asp>) is *presumed* to have been exposed to phenoxy herbicides and is therefore eligible to enroll and obtain an AO Registry exam. Verifiable evidence of such in-country service constitutes eligibility. (See <http://www.publichealth.va.gov/exposures/agentorange/militaryexposure.asp>)

Under these same laws, however, any other U.S. veteran who may have been exposed to dioxin or other toxic substance in an herbicide or defoliant during their military service must provide proof of exposure to enroll and obtain an AO Registry exam. For an incomplete list of locations and dates where dioxin (Agent Orange and other agents) was used, consult the VA information available online at <http://www.publichealth.va.gov/exposures/agentorange/militaryexposure.asp>

*Veterans eligible for inclusion in the AO Registry do not need to be enrolled in the VA healthcare system.*

### Does Participation in the AO Registry Constitute a Compensation Claim for VA Compensation?

No, although the results of an AO Registry exam may be used to support a subsequently filed claim, the exam in and of itself does not constitute the filing of a claim.

**GET AN EXAM.** Even if you feel healthy, there are several exam options available to you, including the VA or a private healthcare facility or physician. If you use the VA system for your examination, consider getting added to the Agent Orange Registry.

### What Does an AO Registry Exam Entail?

The exam consists of four basic parts:

- An exposure history to determine where, when, and how the veteran was exposed to AO or other toxic chemicals before, during, and after service in Vietnam;
- A medical history to document health problems experienced by the veteran since the time of exposure;
- Laboratory tests such as blood chemistries, urinalysis, and a chest x-ray; and

- A physical examination of 21 body parts, focusing on those systems commonly affected by toxic chemicals, such as the liver, kidneys, skin, and reproductive, endocrine, immunological, and nervous systems.

You should try to arrange for the lab tests to be done at the same time as the scheduled physical exam. You may also be eligible for reimbursement from the VA for the cost of travel to the VA exam.

VVA encourages all veterans with Vietnam service to have an Agent Orange Registry exam, regardless of their current health status, as it is always possible that the exam may detect health problems that are caused by something else for which the VA may provide treatment and/or compensation.

### **What If the AO Registry Exam Uncovers a Medical Condition That Requires Further Treatment?**

If the AO Registry exam uncovers a condition in a veteran who is enrolled or otherwise eligible for VA health care, and that condition requires further treatment, the veteran is to be referred to a VA primary care clinician to obtain the necessary medical assessment and appropriate treatment. If you are not enrolled or otherwise eligible for VA health care, the VA may suggest that you enroll in the VA or seek non-VA care.

### **Private Healthcare Examination for Claim Purposes**

If you use a private healthcare facility for your examination, you will need to submit a detailed medical report to the VA Regional Office, including documentation of your diagnosis and whether it is as likely as not due to herbicide exposure, and you must also explain the impact of your diagnosis on your life.

In addition, *always request copies* of the lab results and copies of the medical history and examination reports whether you use the VA or private healthcare provider.

## **WHAT IF I HAVE A DISABILITY THAT IS NOT ON THE LIST?**

If you have a disability that is not on the list of conditions recognized as caused by Agent Orange exposure, VVA recommends that you speak with a veterans service officer about filing a claim, as long as your disability is not obviously caused by events after military service.

You may want to speak with your physician or specialist about potential causes of your disability. For instance, if you have erectile dysfunction, it may be caused by diabetes mellitus, which is caused by Agent Orange exposure. This would be a disability “secondary” to Agent Orange exposure, and you would qualify for disability compensation.

Also, VA recognizes other presumptions for disabilities caused by other exposures and service in other areas of the world, which can be found at 38 C.F.R. § 3.309. Go to <https://www.govinfo.gov/app/details/CFR-2020-title38-vol1/CFR-2020-title38-vol1-sec3-309> or <https://www.govinfo.gov/app/details/CFR-2020-title38-vol1/CFR-2020-title38-vol1-sec3-307>

Veterans may receive benefits if they can prove service where herbicides were used and provide a medical expert’s opinion based on scientific evidence that shows the veteran’s disability is due to herbicide exposure.

## HOW DO I FILE A CLAIM WITH THE VA FOR PRESUMPTIVE AGENT ORANGE DISABILITY COMPENSATION?

**Step 1: GET HELP** You will probably find the VA laws, regulations, and procedures surrounding Agent Orange-related claims to be complicated and frustrating. Many Veterans Service Organizations (VSOs), including VVA, offer free assistance to help you present your claim to the VA (see page 19 of this guide for VSO information). *Choose a representative carefully*; ask questions about his or her claims' experience; get a feel for the representative by talking with him or her. For example, ask if there are any limits on their service *before* you sign a power of attorney appointing him or her as your representative. Stay personally involved in your case to make certain everything that should be done is done. Communicate regularly with your representative. *Make copies of ALL documents used in your claim, and keep them in a safe place* in the event any of your paperwork is lost, misplaced, or destroyed during the claims process. Missing paperwork is one of the main reasons for delay in processing a claim.

**Step 2: APPLY** If you believe that you are entitled to compensation benefits under the VA's Agent Orange rules and have never previously filed a VA disability claim for an Agent Orange-related illness, or have previously filed a VA disability or death claim for such an illness, but that claim was denied before September 25, 1985, and that claim is not being currently considered, then either file or establish an intent to file a claim as soon as possible. Make sure that the claim or intent to file a claim includes the date, your full legal name, Social Security number, and your VA C-file number, if known. Also make sure to sign the claim or intent to file a claim. Suggestions about how to establish an intent to file a claim can be found on page 18.

The intent to file a claim can be considered as an initial claims application, and you will eventually be required to complete additional official VA forms. Do not delay sending the intent to file until you and your representative have gathered the evidence to support your claim. The earlier you file the claim, the better, because if your claim is granted, the monthly compensation usually starts from the date you first filed your claim.

**Step 3: FINISH THE CLAIM APPLICATION PROCESS** Once the VA receives your informal claim, you will eventually be sent VA Form 21-526, the official "Application for Compensation and Pension." Generally speaking, you have one year (365 days) from the date the VA mailed you Form 21-526 to fill out and return it to the nearest VA Regional Office. Follow the advice of your representative in completing the form. You have the right to review your military service records and any other records in your VA file before completing the form. Make sure to make a copy for your records.

*NOTE: From this point on during your claims process, all communication and submission of documents with the VA should be coordinated through your representative. If you are approaching a deadline and are unable to contact your representative, call their national office or contact VA. Do not miss a deadline.*

**Step 4: GATHER EVIDENCE** Collecting evidence to support your claim can be time-consuming and very frustrating — but absolutely essential to winning your claim. Once the VA Regional Office receives your

**A**sk your representative to take a look at the claim and then make a copy for your records. Send the original claim to the VA Regional Office nearest your home address (do NOT send it to the nearest VA hospital) via "Certified Mail, Return Receipt Requested" and keep the receipt in your records after it is returned. If you have not heard back from the VA Regional Office within 30 days, your representative should call 1-800-827-1000 to verify receipt.

VA Form 21-526, it should determine whether or not your claim is plausible. If so, then the VA is legally required to help you gather the evidence — but don't count on the VA to assist you. You and your representative should attempt to obtain all of your private post-military service and VA medical records, along with all of your military personnel and medical records. These records should be provided directly to your representative so that your representative can determine which documents should be submitted to the VA Regional Office in support of your claim. Make a copy for your records. To obtain one free copy of your military personnel and medical records, visit <https://www.archives.gov/veterans/military-service-records> to submit a form SF-180 via mail or fax. You may also send a letter requesting your records to:

National Personnel Records Center  
1 Archives Drive  
St. Louis, Missouri 63138

<http://www.archives.gov/veterans/>

If the NPRC tells you that your records are missing, your representative can help you file a National Archives and Records Administration Form 13075, "Questionnaire About Military Service." The information you supply on the Form 13075 will be used by the NPRC to reconstruct lost, destroyed, or difficult-to-find military personnel records.

If you have used VA medical services in the past, if your claim was filed some time ago, or if this is a claim for compensation increase or a reopened claim, you have the right under the Privacy Act to find out what information is contained in your VA claims file. To obtain a free copy of your VA C-file, simply send a letter to the Regional Office that holds your C-file (usually the one where your claim has been filed) and request a copy. Always make a copy for your records. You and your representative should carefully review the C-file to determine if any information is missing.

**Step 5: ORGANIZE EVIDENCE** With the assistance of your representative, organize your evidence and arguments in written form for presentation to the VA Regional Office.

*Private Medical Records:* If you received care from private treatment providers that relates to the claims you are filing, request those records from the private provider and submit them to VA. At the very least, send VA medical evidence of your diagnosis with the disability you are claiming.

*Other Medical Evidence:* If you are filing for a condition that is not on the "presumptive" list, it's unlikely VA will make the connection between your condition and herbicide exposure. However, it is helpful to add corroborating medical evidence, such as medical journal articles that link your condition and AO exposure. (See especially <https://scholar.google.com/> )

*Personal Testimony:* If your service records do not reflect clear herbicide exposure, it is helpful to send VA a personal statement that addresses how you were exposed to herbicides. Detail is very important, so take your time to record everything you remember about your exposure.

### **What if my claim is denied?**

If the VA Regional Office determines that your disability is not service-connected, or if the evaluation of your disability is lower than you think is fair, you have the right to appeal to the Board of Veterans' Appeals in Washington, D.C.

**Appeals Step 1:** With the assistance of your representative, you should file a written “Notice of Disagreement” with the VA Regional Office within one year (365 days) of being notified of the denial and request a written copy of the rating decision. In your Notice of Disagreement letter, be sure to include the date of the VA’s letter of denial, the claim number, and the list of benefits you are still seeking. Make a copy for your records. If you miss the one-year deadline for sending your Notice of Disagreement letter and have not requested an extension, the decision of the VA Regional Office may become final. You can re-open your claim at the VA Regional Office if you provide *new* and material evidence supporting your claim; however, the effective date of your claim will change.

You have three choices when appealing your VA decision:

*Supplemental Claim* – Choose this option when you want to add new evidence for your claim. Attach your new evidence to a VA Form 20-0995. (<https://www.vba.va.gov/pubs/forms/VBA-20-0995-ARE.pdf>)

*Higher Level Review* – Choose this option when you have no new evidence but you want VA to review your case again. Submit a VA Form 20-0996. (<https://www.vba.va.gov/pubs/forms/VBA-20-0996-ARE.pdf>)

*Appeal to the Board of Veterans’ Appeals* – Choose this option if you want a judge to review your case. You will be able to select whether you want to add evidence or have a hearing with a judge. Submit a VA Form 10182. (<https://www.va.gov/vaforms/va/pdf/VA10182.pdf>)

**Appeals Step 2:** If you and your representative have followed Appeals Step 1, and the VA continues to deny your claim, the VA Regional Office will respond to your notice of disagreement with a “Statement of the Case” letter to you and a copy to your representative, which details the laws that apply to your claim and the reasons why the claim was denied. Along with the Statement of the Case letter, the VA Regional Office will provide you with “the substantive appeal” form, VA Form 9. You and your representative must complete this form and return it to the VA Regional Office *within 60 days* of the date on the Statement of the Case letter for the Board of Veterans’ Appeals to further consider your appeal. Again, make copies for your records. Return the completed VA Form 9 to the VA Regional Office within 60 days, regardless of whether or not you’ve requested a hearing under Appeals Step 1.

After your representative has submitted your VA Form 9, the VA Regional Office will send you and your representative a dated letter telling you that your appeal has been assigned a number and been put on the Board of Veterans’ Appeals docket. You will also be notified when your file has been sent to the Board of Veterans’ Appeals in Washington, D.C. You will then have 90 days from the date of this second notification to submit new evidence, request a hearing, or change your representative.

### **What if my appeal is denied, or I am not satisfied by the decision of the Board of Veterans’ Appeals?**

You have several options, but you should consult an experienced veterans’ service officer or attorney before you choose any of these: a) request reconsideration by the Board of Veterans’ Appeals; b) formally appeal to the U.S. Court of Appeals for Veterans’ Claims; and/or c) re-open your claim at the Regional Office with new and material evidence.

### **Can I hire a lawyer?**

Yes, you may hire a lawyer or agent to represent you, but only after you have filed a “Notice of Disagreement” with a VA Regional Office.

## IS PRESUMPTIVE SERVICE-CONNECTED AGENT ORANGE DISABILITY COMPENSATION AVAILABLE TO SURVIVING FAMILY MEMBERS OF DECEASED VIETNAM VETERANS?

**Y**es. If a Vietnam veteran dies of a medical condition considered to have resulted from exposure to Agent Orange during his/her military service, certain surviving family members may be eligible for monthly VA compensation payments through the VA's dependency and indemnity compensation (DIC) program.

### Who Is Eligible?

To be eligible for DIC benefits, a surviving family member must show two things:

1) The family member meets one of the following criteria:

- You were married to the veteran at the time of death, and you had lived with the veteran from the date you were married until the veteran's death, unless separation occurred because of the veteran's misconduct without fault on your part; you are not currently married, remarried after age 57; or you are not currently living with another person and claiming to be the spouse of that person. There may be different rules that apply if you either were married to the veteran for less than one year or were in a common-law relationship with the veteran;
- You are a son or daughter of the veteran under the age of 18, are unmarried, and there is no eligible surviving spouse;
- You are a son or daughter of the veteran, 18 years old or older, and before you reached the age of 18, you became disabled and permanently unable to support yourself;
- You are a son or daughter of the veteran, unmarried, between the ages of 18 and 23, and are currently attending a VA-approved school; and
- You are the surviving parent or parents of the deceased veteran. The term "parent" includes a biological, adoptive, or foster parent. A foster parent is a person who legally stood in the relationship of a parent to the veteran for at least one year before the veteran's last entry into active duty.

Eligibility for dependent parents' DIC is need-based. When countable income exceeds the limit set by law, no benefit is payable. Income limits are adjusted annually.

2) You must show that the veteran was exposed to Agent Orange in one of the places where VA presumes herbicides were used (see page 6 of the guide), and the veteran developed one of the illnesses/diseases considered by the VA to be presumptively related to exposure to Agent Orange, and that the illness/disease was the principal or a contributory cause of the veteran's death.

*NOTE: These eligibility requirements can be met, even if the deceased veteran never applied to the VA for disability compensation before death; or if the veteran had applied for compensation before death, but the claim was denied; or if the claim/appeal was pending at the time of death.*

### How Do I File a DIC Claim?

The procedures used by the VA for this type of claim are generally the same as those used to handle any veteran's claim; VA Form 21P-534EZ is used. Information to be included in an informal claim letter can be found on page 18 of this guide.

For more information and downloadable PDF forms, go to <https://www.va.gov/find-forms/about-form-21p-534ez/> or call 1-800-698-2411. You may also find more information on DIC claims on pages 17-18 of this guide.

**Step 1: Intent to File** – It's important to establish an "Intent to File" with VA to get the earliest possible effective date. Either submit an Intent to File (VA Form 21-0966) by mail or fax (<https://www.vba.va.gov/pubs/forms/VBA-21-0966-ARE.pdf>); or call 1-800-827-1000 and let the representative know that you would like to file a claim for survivors' benefits.

**Step 2: Apply** – If possible, submit your application within one year of the veteran's death, but you can apply anytime. Submit a VA Form 21P-534EZ. (<https://www.vba.va.gov/pubs/forms/VBA-21P-534EZ-ARE.pdf>)

**Step 3: Add Evidence** – In addition to the military records, medical records, and medical evidence discussed on page 11 of this guide, the following will be helpful to a DIC claim:

*Social Security Records* – Include any application for Social Security Survivors' Benefits that you filed after the veteran died. This could impact your effective date for DIC benefits.

*Death Certificate* – Include a copy of the veteran's death certificate.

**Step 4: Appeal** – If VA denies your claim, follow the appeals procedure listed on page 12 of this guide.

## IS PRESUMPTIVE SERVICE-CONNECTED AGENT ORANGE DISABILITY COMPENSATION AVAILABLE TO BIOLOGICAL CHILDREN OF VIETNAM VETERANS BORN WITH CERTAIN BIRTH DEFECTS?

**Y**es. The children of Vietnam veterans who are born with a birth defect may be eligible for compensation, free medical care, and vocational rehabilitation services.

### Who Is Eligible?

To be eligible for these benefits, you must show three things:

- 1) You are the natural, biological child of a Vietnam veteran – one of your biological parents served in the active military, naval, or air service in the Republic of Vietnam for at least one day during the period January 9, 1962, to May 7, 1975; OR your parent served on a Blue Water Navy vessel offshore of the Republic of Vietnam, or on another U.S. Navy or Coast Guard ship operating in the coastal waterways of Vietnam between November 1, 1955, and May 7, 1975; OR your parent served on any U.S. or Royal Thai base from 1/9/62-6/30/76; Laos from 12/1/65-9/30/69; Mimot or Krek, Kampong Cham Province, Cambodia, from 4/16/69-4/30/69; Guam, American Samoa, or their territorial waters from 1/9/62-7/31/80; and Johnston Atoll, on or aboard a ship that called there, from 1/1/72-9/30/77;
- 2) You were conceived after the veteran parent first began service; and
- 3) You were born with a birth defect listed on page 5 of this guide.

Proof of the parent's exposure is not necessary. These children are entitled to three types of benefits: a) monthly compensation payments based upon the degree of the child's disability; b) VA medical care or reimbursement from the VA for private medical care for medical problems related to the birth defect; and c) vocational rehabilitation services.

### What if I am the child or grandchild of a Vietnam veteran and have a medical condition NOT listed on page 5?

File a claim and attach a medical opinion, if possible. Though your condition is currently not recognized, it may be at a future date.

### How Do I File a Claim?

- i) The procedures used by the VA for this type of claim are generally the same as those used to handle a veteran's claim, but a special application, VA Form 21-0304, is used. Such children are generally not required to undergo a VA medical exam. For more information and for a downloadable PDF form, go to <https://www.va.gov/find-forms/about-form-21-0304/> or see pages 17-18 of this guide.

*NOTE: In addition to the Service-connected Agent Orange Disability Compensation award noted above, the VA also offers "dependents' allowance" to children of veterans who have been rated with at least a 30 percent service-connected disability. Children of veterans who are rated with a 100 percent permanent disability also are eligible for education assistance and health care under a separate VA program, CHAMPVA (the Civilian Health and Medical Program of the VA). This program covers dependents and survivors of certain veterans who are ineligible to receive health benefits under the Department of Defense TRICARE program.*

## **IS PRESUMPTIVE SERVICE-CONNECTED AO DISABILITY COMPENSATION AVAILABLE TO INCARCERATED VIETNAM VETERANS?**

**Y**es, but even if you are awarded Agent Orange disability compensation, you will likely not receive the entire monthly amount while you remain incarcerated, especially if you were convicted of a felony. However, any monetary benefits withheld from you may be “apportioned” (divided between you and an assigned family member).

### **How Do I File a Claim?**

The procedures used by the VA for this type of claim are generally the same as those used to handle any veteran’s claim, but VVA recognizes that incarcerated veterans face many challenges, especially when seeking the required Agent Orange medical exam. A few Departments of Corrections will arrange transport to VA medical facilities, but most do not. Try to obtain a detailed medical report or exam conducted by the facility’s doctor. To assist the doctor, obtain a copy of the “VA Physician’s Guide to Disability Evaluation Examinations” and rating schedule by writing to the nearest VA Regional Office and invoking the federal Freedom of Information Act. Another alternative is to submit a petition to your facility administrator asking that he or she request a VA doctor visit your facility.

## **WHAT OTHER BENEFITS ARE AVAILABLE TO A VIETNAM VETERAN WITH AN AGENT ORANGE-RELATED ILLNESS?**

### **Social Security Benefits**

The Social Security Administration administers certain kinds of insurance and Supplemental Security Income (SSI) benefits for eligible adults and some eligible children of Vietnam veterans under the age of 18. In some cases, veterans can receive both Social Security Disability Insurance and VA disability compensation. You should check with your nearest Social Security Administration office for details about these programs.

### **Information for Military Retirees**

As of June 1, 2003, some disabled military retirees no longer have their military pay offset by VA compensation. More information on Combat-related Special Compensation and Concurrent Retirement Disability Pay (DFAS CRSC/CRDP) can be found online at <http://www.dfas.mil/retiredmilitary/disability/comparison.html> or you can call 1-800-321-1080.

### **Information for Surviving Family Members**

As of December 1, 2021, Dependency and Indemnity Compensation (DIC) payments for the eligible surviving spouses and dependent children of disabled Veterans are tax exempt and may replace or supplement your VA Survivor's Pension or your Survivor Benefit Plan (SBP), if you have one. For more information on current DIC, VASP, and SBP rates and on your eligibility, go to: <https://www.va.gov/disability/survivor-dic-rates/#dic-rates-if-youre-the-survivi>.

### **State Veterans Benefits**

Many states offer benefits to veterans with a service-connected disability. You may qualify for reduced property tax, driver's license fees, and more. For more information on your state's veterans benefits, please see <https://nasdva.us/resources/>; or <https://nvf.org/state-benefits-for-veterans/>; or you can call 1-888-777-4443 for Vet-to-Vet Assistance.

## HOW TO FILE A CLAIM AND WHAT IS INTENT TO FILE

**VA** requires veterans seeking disability benefits to use standardized claims and appeals forms. (For copies of most claims forms and most recent rules, go to <https://www.va.gov/find-forms/>.) Veterans may choose to submit an application for compensation online through the eBenefits ([www.ebenefits.va.gov](http://www.ebenefits.va.gov)) portal; however, veterans should strongly consider filing claims with the assistance of a representative of a Veterans Service Organization (VSO). Also, notifying the VA of your “**intent to file**” may entitle you to an earlier effective date.

Within one year of the intent to file, claimant must file:

- (1) Veterans who have not previously filed a claim and are diagnosed with one of the new presumptive conditions and meet eligibility requirements should submit a new claim on **VA Form 21-526EZ, Application for Disability Compensation and Related Compensation Benefits**. Survivors who have not previously filed a claim and meet eligibility requirements should submit a new claim on **VA Form 21P-534EZ, Application for DIC, Survivors Pension, and/or Accrued Benefits**. For more information, go to <https://www.va.gov/resources/the-pact-act-and-your-va-benefits/#vietnam-era-veteran-eligibilit>
- (2) Veterans who were previously denied a toxic-exposure related claim are encouraged to file a supplemental claim using **VA Form 20-0995, Decision Review Request: Supplemental Claim**. Survivors who were previously denied dependency and indemnity compensation (DIC), related to any of the new presumptive conditions, are likewise encouraged to refile a claim.

Veterans can notify VA of their *intent to file* a claim in order to establish the earliest possible effective date for benefits if they are determined eligible. An *intent to file* a claim may be submitted in one of three ways:

- (1) Electronically via eBenefits or with the support of a Veterans Service Organization (VSO) through the Stakeholder Enterprise Portal
- (2) Completing and mailing a paper VA Form 21-0966, *Intent to File a Claim for Compensation and/or Pension, or Survivors Pension and/or DIC*
- (3) Over the phone with a VA call center or in person with a public contact representative.

Veterans may appoint a duly authorized representative, such as a VSO, who can notify VA of a claimant's intent to file using any of the methods listed above. VA will provide an individual up to one year from the date they submit their *intent to file* a claim to complete the required application form. Veterans may wish to use this one-year period to gather evidence necessary to support the claim so that evidence can be submitted along with the application form.

## VETERANS SERVICE ORGANIZATIONS

Many Veterans Service Organizations offer free assistance to help you present your claim to the VA. This includes representation at hearings before the VA Regional Office, the Board of Veterans' Appeals, and the U.S. Court of Appeals for Veterans Claims. Some of these VSOs have a representative at your nearest VA Regional Office. You can also locate a VSO representative by contacting the organization's national office online or by phone. These are just a few of the many VSOs able to assist.

You may also contact the National Veterans Legal Services Project, NVLSP, at (855) 333-0677, [agentorange@nvlsp.org](mailto:agentorange@nvlsp.org) or P.O. Box 65762, Wash. D.C. 20035. NVLSP can represent you at no cost to make sure VA gives you the earliest possible effective date for compensation and health benefits related to Agent Orange exposure.

In addition, almost every state has a commission, division, or department of veterans affairs that provides representation to veterans and their families. In some states VSO representatives' offices are located in county, state, or federal government facilities. These may be found in the government pages of your local telephone directory.
